EXTRAORDINARY NUTS

Specialists at baking, seasoning and
caramelising the best grades of nuts

The top selling nut brand in the Best Brands Survey
of independent retailers (2021-2022 edition)

About Cambrook Foods

- An award winning specialist manufacturer of baked, seasoned and caramelised nuts.
- A privately owned company founded in 2012 by Angus Cameron and Michael Brooks who both have over 25 years of experience in the industry.
- We are a member of the Guild of Fine Food and operate from our BRC accredited (AA Grade) factory in Andover, Hampshire.

We supply:

- Hotels, restaurants and bars with cocktail and minibar nuts & snacks. Customers include The Ritz, Claridges, The Dorchester and The Savoy.
- Good food retailers, hampers, coffee shops and pubs with Cambrook branded packets and jars. Customers include Fortnum & Mason, Whole Foods and Fullers.

Sustainability

- Our nuts are sourced from well established reputable suppliers most of whom are Sedex (Supplier Ethical Data Exchange) members <https://www.sedex.com/our-vision-and-purpose/> an organisation which aims to promote not only good working conditions but also sustainable business models to protect the environment
- All our raw products are delivered by sea freight
- Following on from extensive packing trials we have switched all our plastic packaging from single use plastic to a recyclable plastic. As well as our policy to eliminate single use plastic we also pack our products into recyclable glass jars
- We are members of OPRL <https://www.oprl.org.uk> a not for profit company which aims to deliver a simple consistent and UK-wide recycling message on retailer and branded packaging to help consumers re-use and recycle more material correctly and more often. Our recyclable plastic packaging adopts these generally recognised OPRL recycling symbols to assist in the drive for more consumer participation in the recycling process
- Our parcel distributor DHL has various targets for reducing greenhouse gas emissions by 2030 and a net zero target by 2050. This includes designing all their new buildings to be carbon neutral as well as electrifying 60% of last-mile deliveries. By 2030 they aim to have more than 80,000 e-vehicles worldwide on the road
- Our electricity supply is from certified 100% renewable sources
- We have invested in machinery that enables us to convert waste cardboard into protective packaging strips used to protect our products in transit
- The installation of LED lights throughout our offices and factory has reduced our energy consumption for lighting by about 50%
